

Money Monday vol 1

Bitcoin

Bitcoin has went up \$40,000
in the last few months.

It is now worth \$100,000
per bitcoin. 16 years ago,

1 bitcoin was worth less
than a cent. But bitcoin

is high risk, high return.

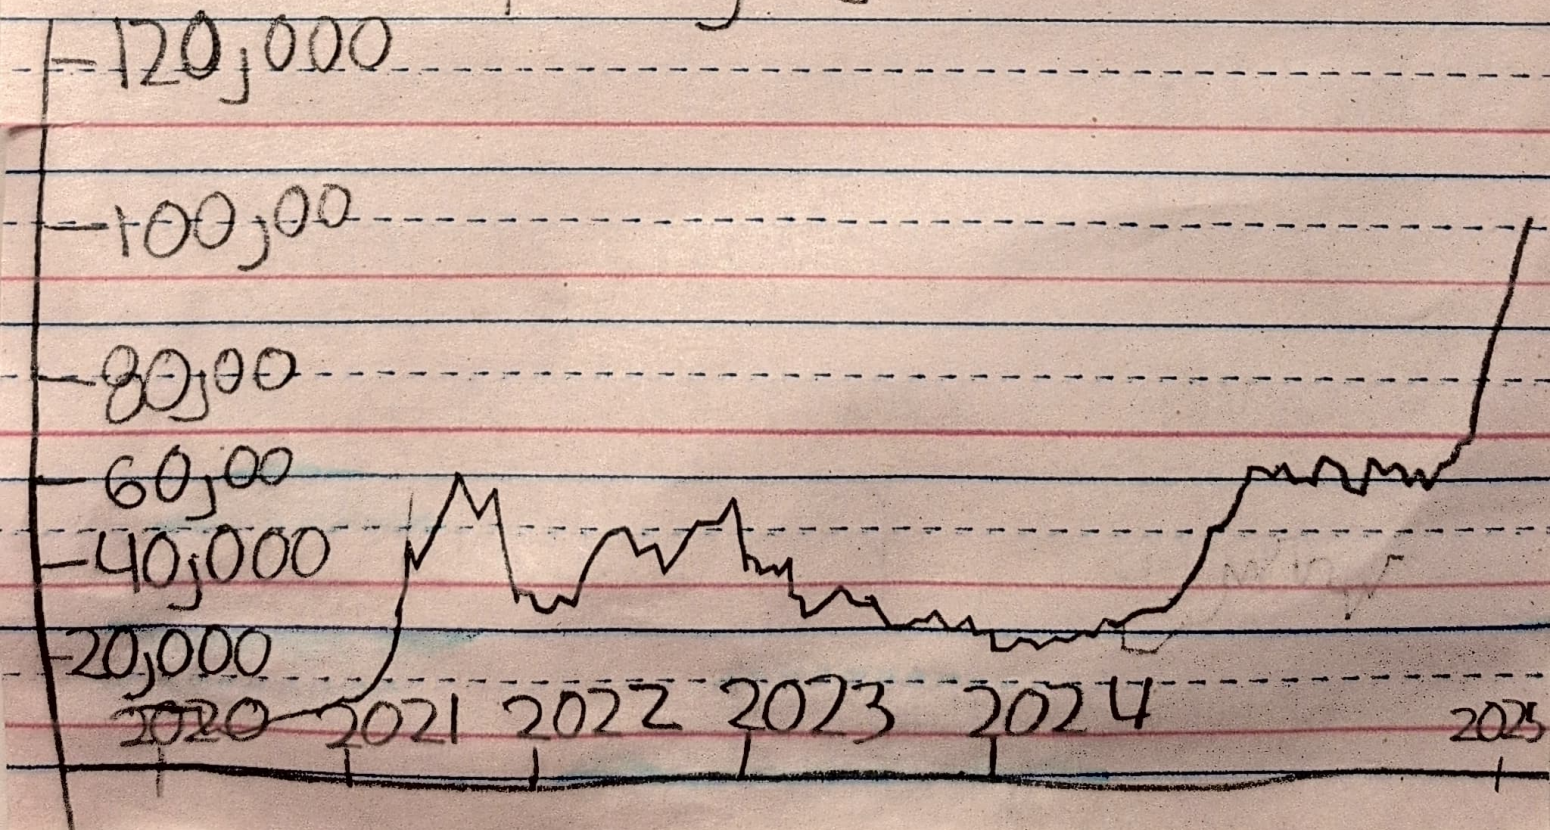

I even bought some

bitcoin. You should also

invest in bitcoin.

Bitcoin is great for young investors. You want to know why I'm telling you why? The risk is high so if it goes down you have tons of time.

Here is the graph.

Bitcoin is rare by nothing.
Bitcoin is extra limited that
is a way to make money.
Bitcoin defends against
inflation. You can now buy
bitcoin like a stock through
ETFs. Bitcoin is an invest-
ment, You should invest
30% - 40% of your income.
Income is money that
you make or gain. I
bought bitcoin through BITB.
